

Slava Bezgachev

Full-stack web developer with a bachelor's degree and +3 years of commercial experience. Check out more about me on <https://bezgachev.com/>

EXPERIENCE

Skazka, Kokshetau, Kazakhstan — Full Stack Web Developer

September 2017 - Current

I am a solo full stack developer, responsible for creating and maintaining the company's websites, as well as maintenance of the company's hardware.

E-Direct Link, Bournemouth, UK — Full Stack Web Developer

December 2016 - March 2017

As a full stack developer I focused on bespoke projects, creating both front-end interfaces and back-end functionality using PHP and Javascript tools such as Silverstripe and ReactJS. Many projects involved diving into unknown code and finding a solution to a problem.

Servon Design, Hampshire, UK — Back-End Web Developer

June 2015 - December 2016

I was responsible for development, testing and deployment of numerous websites, predominantly based on Concrete5 platform. The role involves teamwork and version control, system administration and regular interactions with clients.

TE Connectivity, Swindon, UK — Web Developer

June 2013 - August 2014

As part of my course I worked as a Web Developer for TE Connectivity. My job involved close cooperation with clients to produce new web applications as well as maintenance of old desktop and web applications and web pages, mostly .NET based.

EDUCATION

University of Reading — BSc Management with IT

2011 - 2015

Modules taken in final year: Evolutionary Computation, Effectual Entrepreneurship, Enterprise Application Integration, Requirements, Domains and Soft Systems, Data Mining. Degree result – 2:1.

Kokshetau, Kazakhstan

Development skills

Node JS – Node is my go-to language for back-end development. I like Express, Apollo Server (GraphQL) and Socket.IO.

React – React is my favourite front-end framework. I prefer using NextJS and Gatsby as starter kits.

Testing – I use Jest for both testing on both the front-end and the back-end.

Databases and DevOps

Databases – I have experience with Postgres and MySQL. I've also used MongoDB for a few small projects.

DevOps and Server Applications – experience with setup and configuration of VMs, Nginx, Docker and LXC among others. Experience with various AWS services. I'm a big fan of Github Actions for simple CI/CD setups.

Operating systems – Linux and Windows. My Linux distros of choice are Manjaro and Debian.

LANGUAGES

Fluent English and Russian, as well as basic Spanish.
